ИНСТИТУТ ПО ГЕННО ИНЖЕНЕРСТВО

ИНСТИТУТ ПО ЗАЩИТА НА РАСТЕНИЯТА

Съобщаваме Ви, че в АЯР се получи информация от Международната агенция за атомна енергия МААЕ-Виена относно програмата за изследователски контракти на МААЕ за 2011 г.

Приложено Ви изпращаме информацията относно областите на дейност за които има възможност да се кандидатства за получаване на изследователски контракт.

Моля, ако желаете да предложите на МААЕ изследователски контракт, да изтеглите от посочения интернет адрес съответните формуляри за участие.

Надлежно попълнените формуляри с предложения за контракти е необходимо да бъдат изпратени от Вас директно в МААЕ на посочения адрес.

При необходимост от допълнителна информация или затруднения с изтеглянето на формулярите моля да се обърнете към г-н Велев на тел. 9406914 или имейл адрес V.Veleff@bnra.bg.

The Secretariat of the International Atomic Energy Agency (IAEA) presents its compliments to the Ministries of Foreign Affairs of its Member States and has the honour to request that they draw the attention of the appropriate Governmental authorities to one of the functions of the IAEA, namely to encourage and assist research on, and the development and practical application of, atomic energy for peaceful uses throughout the world. Research institutes in Member States have the opportunity to participate in research projects coordinated by the IAEA under research and technical contracts and research agreements.

The Secretariat would, therefore, be grateful if the attached paper could be brought to the attention of institutions that might be interested in proposing projects for research and development within the topic areas listed in the attachment.

For each proposal approved, a research, technical or doctoral contract or research agreement, as explained in the attached paper, will be awarded to the institution entrusted with the work, and the Government of the Member State concerned will be informed accordingly.

The Secretariat of the International Atomic Energy Agency avails itself of this opportunity of assuring the Ministries of Foreign Affairs of its Member States of its highest consideration.

2011-06-02

Enclosure: IAEA Coordinated Research Activities in 2011

IAEA Coordinated Research Activities in 2011

I. General Information

I.1. Statutory provisions

The International Atomic Energy Agency (IAEA) is authorized under its Statute to encourage and assist research on atomic energy for peaceful uses throughout the world and its development and practical applications. The IAEA's programme and budget for 2011 accordingly provides for the placing of research, technical and doctoral contracts and research agreements with universities, colleges, research centres, and laboratories, and other institutions in Member States on subjects directly related to the IAEA's work.

I.2. Financial support

The IAEA's financial support of a project is normally in the form of a lump-sum cost-sharing contract. The Contractor is usually expected to bear part of the cost of the project and, in any case, to continue to make normal contributions covering overheads and other expenses and the IAEA contributes an appropriate percentage of the total estimated costs. Owing to the limited resources available, the amounts awarded are rarely large — the present average being approximately €6000 per annum per contract. Larger awards may, however, be considered. In addition to the contract award, Contractors participating in IAEA coordinated research projects (CRPs) are invited to attend periodic research coordination meetings at the IAEA's expense.

Agreements may be awarded to institutes, normally in developed countries, for participation in an IAEA CRP. Under such agreements, no financial award is made to the agreement holder other than the provision to attend research coordination meetings at the IAEA's expense.

I.3. Selection of Institute

The IAEA selects the institutions to which research contracts and agreements will be awarded. When a specific proposal for research is made by an institution in a Member State, the decision to award a research contract or agreement is made after careful consideration of the technical merits of the proposal, the compatibility of the project with the IAEA's own functions and approved programmes, the availability of appropriate facilities and personnel in the institution and previous research work related to the project.

Additionally, where it is recognized that the award of a particular research or technical contract or research agreement would materially assist one of the IAEA's programmes, an invitation is sent to those institutes believed to have the necessary facilities and personnel, and the Government of the Member State concerned is kept informed.

In providing research support from the limited funds available to the programme, priority is normally given to proposals received from institutions in developing Member States and to qualified young and female researchers.
